

Taylan Daldal

Mechanical Engineer

Mechanical Design | Simulation | CAE | FEA | FEM | SolidWorks | Ansys | Modeling | Engineering Analysis | Optimization | Automation | AI | Robotics | Mechatronics

Through 4 years of professional experience, the focus has been on innovation and development to enhance efficiency and performance. Experienced in mechanical design and engineering analysis across aerospace and manufacturing, improving performance metrics by 9%. Created solutions with automation and optimization. Developed cross-functional teamwork skills by collaborating with stakeholders from 20+ countries on a global scale.

WORK EXPERIENCE

Trust and Safety Expert Teleperformance

06/2025 - Present

Global digital business services company in Berlin, Germany

- Applied quality guidelines to process high-volume data for AI optimization and data quality, maintaining 96% monthly accuracy
- Processed ~300 data/day with consistent speed and precision in a fast-paced workflow
- Improved data consistency by applying rule-based decisions across 25 guideline categories

Business Development and Sales Engineer Astor Energy

12/2022 - 11/2023

One of Europe's largest transformer manufacturers located in Ankara, Turkiye

- Created an innovative UI with VBA programming that increased the accuracy and speed of tender preparation by 67%+, improving KPIs and boosting sales up to 28%
- Achieved a 30% increase in the number of tenders delivered to customers
- Secured €3.2M in individual sales and led international sales processes, managing bidding and technical support across the European market

Mechanical Engineer Tayder Engineering

02/2022 - 11/2022

R&D and freight elevator manufacturing company located in Ankara, Turkiye

- Attained a 12% improvement in material yield and production quality through design and process automation enhancements
- Delivered 16% cost savings by reducing rework and simplifying workflows, increasing manufacturing efficiency
- Provided technical support and managed international contracts, contributing to 89% customer satisfaction

Mechanical Engineer Turkish Aerospace Industries Inc.

02/2021 - 12/2021

Aerospace defense company located in Ankara, Turkiye

- Enabled a 9% improvement in performance metrics and more precise calculations through optimization and standardization of analyses
- Prepared detailed technical specifications for 20+ aircraft and helicopter components based on engineering analyses
- Supported technical documentation and analysis for 7 aircraft programs

EDUCATION

Master of Business Administration (MBA)

Concordia University Chicago - 1.0/6.0 | German GPA

10/2023 - 10/2025

By Berlin School of Business and Innovation, Germany

Mechanical Engineering

Akdeniz University - 2.17/6.0 | German GPA

09/2014 - 08/2020

Antalya, Turkiye

SKILLS

Computer Aided Design & Engineering

SolidWorks

Ansys Simulation

Engineering Analysis

Optimization

Automation

AI Applications

Robotics & Embedded Prototyping

Arduino

Python

Data Analysis

VBA

Business Development

Technical Sales

PROJECTS

Robot Arm Manufacturing

- Engineered a robot arm capable of performing 3 distinct functions
- Programmed with Arduino and used 3D printing for components

Damage Detection via Sound Analysis

- Developed 5 types of car engine damage identification software with Python through sound analysis
- Achieved results in 8 seconds, inspired by Shazam

CERTIFICATES

AI for Business: Driving Innovation

By BSBI, Berlin, Germany

Python Programming and Practice

By BSBI, Berlin, Germany

Managing and Leading Effective Organizations

By Peregrine Global, Berlin, Germany

LANGUAGES

German (B1 - Attending a Course)

Limited Working Proficiency

English (C1)

Full Professional Proficiency

Turkish (C2)

Native or Bilingual Proficiency

INTERESTS

AI, Automation, Robotics and Sensor Systems

Music Production, 1M+ Streams Worldwide
