

Taylan Daldal

Mechanical Engineer

Mechanical Design | CAE | CAD | FEA | FEM | Ansys | SolidWorks | Simulation | Engineering Analysis | Optimization | Automation | AI | Robotics | Mechatronics

Through 4 years of professional experience, the focus has been on innovation and development to enhance efficiency and performance. Applied mechanical engineering across aerospace, energy, and manufacturing. Created automation solutions that increased accuracy and speed by ~67%. Developed cross-functional teamwork skills by collaborating with stakeholders from 20+ countries on a global scale.

WORK EXPERIENCE

Trust and Safety Expert Teleperformance

06/2025 - Present

Global digital business services company in Berlin, Germany

- Applied guidelines to process high-volume data for AI optimization, maintaining 96% monthly accuracy
- Processed ~300 data items/day with consistent speed and precision
- Improved data consistency by making rule-based decisions across 25 guideline categories

Business Development and Sales Engineer Astor Energy

12/2022 - 11/2023

One of Europe's largest transformer manufacturers located in Ankara, Türkiye

- Created an innovative UI with VBA programming that increased the accuracy and speed of tender preparation by ~67%, contributing to sales growth of 28%
- Made the company's first sale to Finland, a €1.26M order for a 100 MVA power transformer
- Secured €3.2M in sales and led international sales processes, managing bids and technical support primarily across Europe

Mechanical Engineer Tayder Engineering

02/2022 - 11/2022

R&D and freight elevator manufacturing company located in Ankara, Türkiye

- Contributed to a 12% increase in material yield through design revisions and manufacturing collaboration
- Facilitated reductions in rework and scrap, contributing to 16% cost savings
- Provided technical support for international client projects, with 89% customer satisfaction

Mechanical Engineer Turkish Aerospace Industries Inc.

02/2021 - 12/2021

Aerospace and defense company located in Ankara, Türkiye

- Prepared technical specifications for transporting 20+ aircraft components based on engineering analyses
- Facilitated a 9% improvement in specification preparation efficiency through the standardization of reference data
- Supported technical documentation across 7 aircraft programs

EDUCATION

Master of Business Administration (MBA) Concordia University Chicago — 1.0 | German Grade

10/2023 - 10/2025

at Berlin School of Business and Innovation, Germany

Mechanical Engineering Akdeniz University — 2.17 | German Grade

09/2014 - 08/2020

Antalya, Türkiye

SKILLS

Computer Aided Design & Engineering

SolidWorks

Ansys Mechanical

Finite Element Analysis

Engineering Analysis

Optimization

Automation

VBA

Robotics & Mechatronics Prototyping

Arduino

Python

Data Analysis

Business Development

Technical Sales

PROJECTS

Portfolio: taylandaldal.github.io

Robot Arm Link Optimization

- Reduced mass by 26.22% through topology optimization
- Removed 9.03 kg while maintaining static and buckling performance

Busbar Thermo-Mechanical Design Iteration

- Increased estimated fatigue life by 51.4x with only a 0.24% mass change
- Achieved a 13.3% reduction in peak stress

On-Arm Camera Mount Lightweighting

- Improved the mount design to make it 7.35% lighter using structural analysis
- Maintained stress and modal performance within 1% of baseline values

Robotic Gripper Stress Reduction

- Modified local geometry to lower peak stress by 13.5% using static FEA
- Raised fatigue safety factor by 15.7%

Robot Arm Prototype

- Engineered a robot arm performing 3 distinct functions
- Programmed with Arduino and produced components using 3D printing

LANGUAGES

German (B1 - Attending a Course)

Limited Working Proficiency

English (C1)

Full Professional Proficiency

Turkish

Native or Bilingual Proficiency

INTERESTS

Music Production, 1M+ Streams Worldwide
